

CONTINUOUS THREAD ALUMINIUM SCREW CAP

The Continuous Thread Aluminium closure is characterised by an uninterrupted spiraling thread. Light in weight, this closure is the preferred choice of consumers and retailers who are highly focused on sustainability, recyclability and reuse of products and packaging.

The organic aesthetic appeal provides a premium presence to the packaging besides preserving the quality of products thanks to the aluminium's superior barrier qualities.

Tecnocap is able to produce innovative and customised sizes, shapes and profiles beyond the wide range of closures already available. Customers can enhance their packaging by customising the closure with a huge range of coatings and multicolor printing, embossing, debossing and perforations.
